Disc Drive Industry

FlexMove[®]

Disc Drive Industry

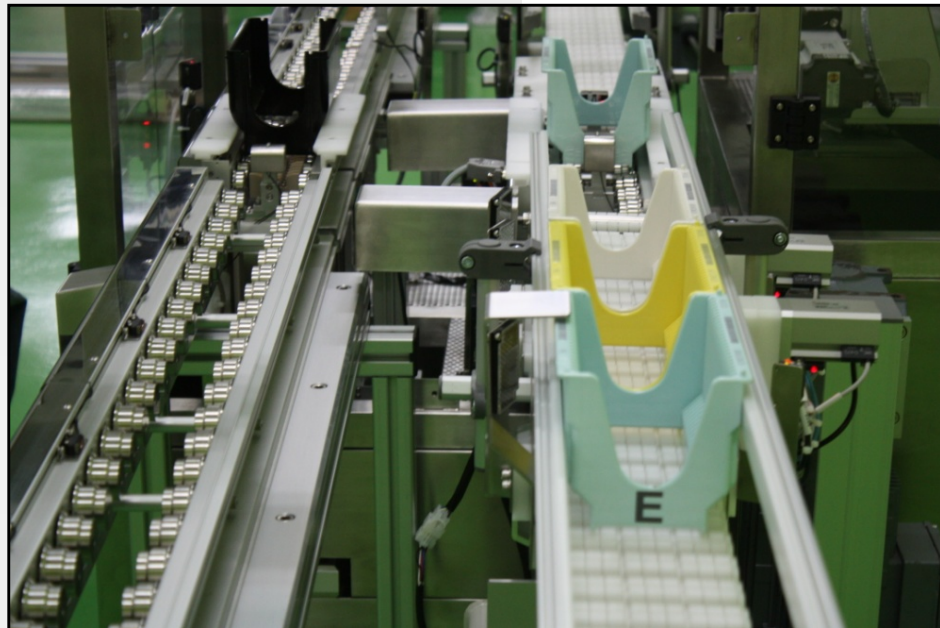

Industrial Automation

FlexMove conveyors are widely used in automation integration in disc drive industry. FC103 Roller top chain conveyor is used to convey cassette with disc during automation processes. FlexMove standard functional module for cassette sequencing and controlling is used.

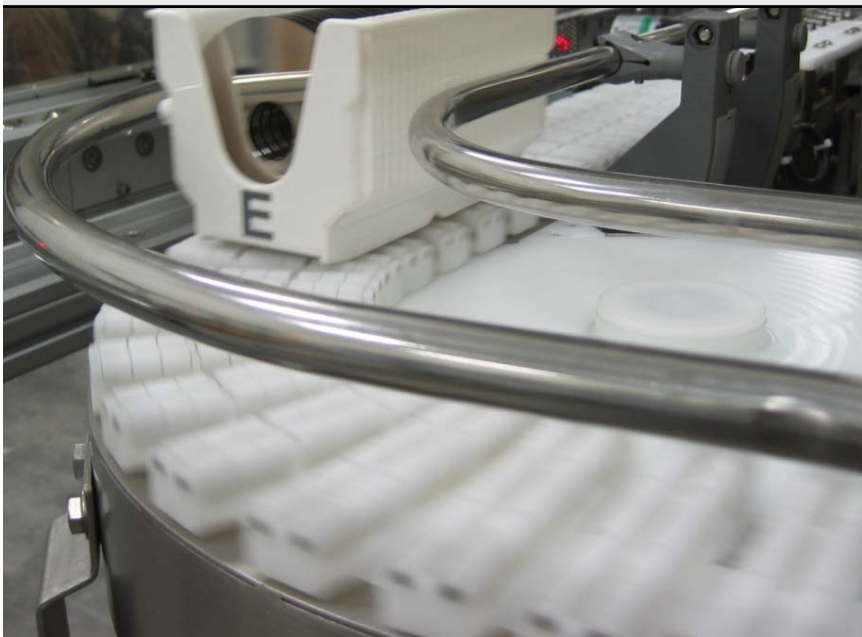

FlexMove®

Industrial Automation

Integration and interfacing of FlexMove conveyor with production machinery and other type of clean room conveyors in disc drive manufacturing industry.

Disc Drive Industry

Clean room conveyor

FlexMove hygiene type stainless steel conveyor is used in stringent clean room environment in disc drive industry.

FlexMove®

Industrial Automation

FlexMove hygiene type stainless steel conveyor is used in disc washing and cleaning processes under wet and clean room environment.
